CHARLOTTE DEMAS

demascharlotte7@gmail.com | New York, NY | www.linkedin.com/in/charlotte-demas

EDUCATION

Wake Forest University — Winston-Salem, NC

B.A. Economics & B.S. Computer Science — *Class of 2025*

GPA: 3.6

DIS Copenhagen, Study Abroad 2024: Artificial Neural Networks & Deep Learning

PROFESSIONAL EXPERIENCE

Software Engineer I - Core Technology Infrastructure — Jersey City, NJ

Bank of America — *July 2025 - present*

- Automate server configuration and provisioning across public and private cloud using Terraform and Ansible
- Lead release testing for platform upgrades across containerized and legacy Java middleware, including WebSphere, JBoss, Tomcat, Apache and IHS.
- Containerized and deployed IBM Application Modernization Accelerator on OpenShift as a proof of concept, supporting a broader effort to migrate applications from VM-based hosting to containers.
- Own incident management for 5 production applications, using Splunk and Ansible Tower logs to drive root cause analysis and remediation.
- Serve as technical onboarding lead for 5 new engineers, authoring documentation for procedures that previously had none.

Global Technology Summer Analyst — Jersey City, NJ

Bank of America — *June 2024 - August 2024*

- Designed and built an incident reporting dashboard for the monitoring needs of multiple engineering teams.
- Built a Python backend for an internal hackathon that summarized unread email and ranked it by urgency using NLP classification over message content and sender metadata.

Portfolio Analytics Engineering Intern — New York, NY

Swiss Re Insurance-Linked Investment Advisors — *May 2023 - August 2023*

- Built Python and SQL pipelines to ingest, transform, and integrate catastrophe bond exposure data into Alternative Capital Partners source systems, powering an exposure-monitoring tool for the portfolio team.

Computer Science Teaching Assistant — Remote

Girls Who Code - Summer Immersion Program — *June 2022 - August 2022*

- Taught Computer Science fundamentals - such as HTML, CSS and JavaScript - to 120+ high school girls.
- Led semi-weekly office hours and supported an advisory group of 12 students.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, HTML, CSS

Infrastructure & Cloud: Linux (RHEL), Terraform, Ansible, Kubernetes, OpenShift, Docker, AWS (EC2), Artifactory, Splunk

ML & Data: SBERT, TensorFlow, NLP, pandas, data pipeline design

Enterprise Platforms: WebSphere, JBoss, Tomcat, Apache, IHS, Venafi, TDI

RESEARCH

Undergraduate Research Assistant — Winston-Salem, NC

Wake Forest University - Economics Department — August 2024 - May 2025

- Built an NLP pipeline linking 50k+ patent descriptions to occupational task descriptions from the O*NET database, using SBERT sentence embeddings to score semantic similarity between patented inventions and specific job functions.
